I'm fine passing on the Wed call. Note that Davis, I and others will be talking Tue afternoon on SC.

-Kevin

Subject: Assuring sufficient certainty of implementation...

Kevin has informed me that the language to be put in the draft plan/ROD along with the letter from Jim and Cindy is acceptable to the state. This means that EPA does not need to put language in the draft plan that OUs have not been precluded at this time from being in the ROD. Kevin also indicated that we still need to work on developing an acceptable framework for implementation by the close of the public comment period as Dennis briefly described on the last call.

The other three main issues, cost, source control and fish advisories are on track to be resolved after the draft plan is released. So it appears to me that we don't need Thursday's call based on any outstanding issues between the state and EPA.

We might need a call to discuss the status of the FOIA request and its potential impact on schedule as well as if Richard or Joni want more prep time with Dennis and Jim before the meetings at the end of the month.

Let me know by noon your time Wednesday if you think the call is needed or not on Thursday. If not needed by each of you, I will cancel it then. If either of you believe the call is needed, state your rationale and I will confirm to everyone that the call will happen and what will be discussed.

Mahalo! (That is thank you in Hawaiian!)
